PLUM CREEK  
**Vision Quest**  
 39024

Massive is the only way to describe this Dameron First Class son out of the great Cherry Knoll 9024. When you combine a triple-crown winning sire with a champion dam you wind up on a vision quest. Show winning presence with rib shape, substance of bone, great hair, and superior structure. We believe this is a bull with a future.

**Exceptional Phenotype, Structure, and Performance** all in one package. In just his first calf crop Plum Creek Paradox 161B has demonstrated an uncanny ability to stamp his calves with long extended fronts, huge bone and foot size, and unbelievable hair. His full sisters have been our high sellers on multiple sales and the first progeny sold out of Paradox have resulted in a champion steer and a reserve champion heifer (both out of first calf heifers). The paradox for Paradox was that he was also our highest WDA bull when he was weaned with his contemporaries. Used on heifers with great success. We are very excited about this young sire.
